

ligase activity, GO:0016874

homophilic cell adhesion via plasma membrane adhesion molecules,

Z disc, GO:0030018

ribosome biogenesis, GO:0042254

mitochondrial translational termination, GO:0070126

NAD binding, GO:0051287

potassium ion transmembrane transport, GO:0071805

cilium movement, GO:0003341

GTPase regulator activity, GO:0030695

RNA modification, GO:0009451

cytoplasmic exosome (RNase complex), GO:0000177

purine ribonucleoside salvage, GO:0006166

protein targeting to mitochondrion, GO:0006626

neural tube closure, GO:0001843

kidney development, GO:0001822

methyltransferase activity, GO:0008168

lyase activity, GO:0016829
